friday the 13th killer puzzle retro jason

It's difficult to say since the game is free but it has a♥♥♥♥♥ton of micro-transactions and it's inferior than some other manager games. HEAVILY EDITED FOOTAGE OF THIS GAME: <https://www.youtube.com/watch?v=61FoumS-Kyc>. Very beautiful game! Perfect for when I'm feeling stressed out and need a little zen. The colors and the music are superb.. It can be funny if you're looking for basic arcade game like haxball, pong etc. to play with your friends at one computer.

Otherwise; I DO NOT RECOMMEND. Don't waste your money.

. The atmosphere is really good and the setting is pretty interesting, but the gameplay is lackluster. You control a drone and the gameplay mainly consists of waiting till the human that is following you has caught up. You progress by picking up the plants in the level while dodging mines, pushing the occasional rock out of the way and looking for dynamite to blow up walls blocking the way. If you make a mistake and your human runs into a mine, you restart the whole level. The game isn't hard, just repetitive.. Still a good race game!. Do you like killing bald eagle Do You Like Shooting Tazer Do You Like TO Stop SUPER THORWING STARS OF DEATH THAT ARE NEON BLOOD RED This GaMe Is For YOU PS.ITS SUPER 80S. Sounded like an interesting concept, but wasn't really much fun to play, mostly because of the UI implementation (I know I'm in the minority here, and usually I wouldn't bash a low-cost indie game for production values, but I think a bit more thought towards usability wouldn't have gone amiss).

- You have to keep monkey-typing into the 'MSN'-like window to advance. You don't know how much monkey-typing is needed to complete the text you're typing, or when you'll next need to monkey-type, so there's a constant cycle of mouse-keyboard-mouse-keyboard, etc. Ok, minor inconvenience, but it grates - there has to have been a better way to do this.

- Windows can't be moved around, rearranged, or ordered on the desktop. There are times at which it would be useful to view information in one window so that you can type it into another, but that ability is missing.

- At one point it's necessary to download and listen to some audio files. This is a cool aspect - merging in the 'real world' with the game - but the sound quality of the files was so scratchy/distorted/badly-levelled that I couldn't understand a word. Perhaps just me, or perhaps they're supposed to be a 'thematic' challenge in this way, but I didn't have any audio-cleanup software handy, so this is the point at which I gave up.

- For some reason the Steam overlay didn't work while in-game, so any time it sent me out onto the real web I had to quit the game entirely then reload it.

Judging by the generally-good reviews, there's probably something worthwhile here if you're willing to stick with it, but I guess I had a patience-failure with this one.. Two words to describe this track Manly and Badass

Come on guys this is low budget. Have a heart.

It's a nice retelling of a great old game.

I had far too short an attention span to complete the original so looking forward to experiencing the story by playing this version instead.

First level felt like the old one, and I'm enjoying it so far.. I do not usually give negative reviews.

While this game may seem appealing as an "escape the room" or logic puzzle / need-a-pen-and-paper-to-figure-out type of thing, I spent about 1 hour stuck in the first room due to what was apparently a bug (of which I have already encountered several).

After restarting, it took little time to progress past the point I was previously stuck.

The puzzles themselves are mostly "find this object and place it here" or the kind of logic problems you'd find in a puzzle book, find this so you can answer this... Some are cryptic, some are not. Some, I feel, are a little unfair to the player and are made purposefully very difficult and frustrating in order to nag at those types of minds that must solve this problem.

They are a little uninspired, I found. There was nothing particularly original, although everything did make sense.

The writing / narrative for the little story there is doesn't inspire any particular interest for me, either. The trailer is quite misleading.

I was hoping for an MKULTRA type experience, as the game made it sound a little like this, but was disappointed and - ultimately - I would rather play The Room or the Rusty Lake series.

I've found myself becoming a little frustrated with the puzzles and the awkward method of progression. Although, to start, the experience was one of mystery and satisfaction when solving the first few puzzles and discovering new things to aid in solving a puzzle on which I was stuck before.

It isn't a particularly popular game, and I cannot bring myself to recommend it.

I will finish it (twice, apparently, for the achievements), but it will likely be removed from my library after this.

Here's hoping that the sequel is an improvement. It is no match for Tales Untold or any other game of this type.

No idea why it's categorised under "action", as there is no action. Only the same kinds of puzzles that I've solved many times over the past 40 years of solving puzzles.

There's also a website link from the discussions, accessible after completing the game, which offers some riddles that... I don't particularly care about.. Another above par HOG from Artifex Mundi. Personally I like Artifex's games but this one sholud be a little bit better. The plot is simple. You are a detective who need to solve a series of mysterious murders. The voice and the graphics are quite good but below the average Artifex quality. The hidden object scenes are good but the minigames are simple. If you are not a fan of the genre don't buy it. Otherwise, don't hesitate to spend some coins.. This game is F*cking terrible, nobody should ever pay money for this game its just awful

- Sounds: Sh*t
- Controls: Sh*t
- gameplay: Boring as F*CK
- Visuals: Ok but still ugly

If you want to play a better game, just play Rising Storm 2: Vietnam; You do need to pay money but its really cheap online so that's a better option

2.1/10. This game is based on the indiana jones trilogy which was made by Steven Spielberg and George Lucas. The game is just like the other lego games where you collect studs and minikit buy new figures and clear the level. One of the problems with the game is that the level is to long which can take about 30 min to beat a level. If you actuall play a hour of this game in one sit

you will get bored with this game since you just doing the same thing. The last problems i have with this is the temple doom stage are just so boring that you will probaly skip this episode. After all that you mayby find this game fun if you just play one stage each time you go into the game . otherwise you will hate this game because is just like lego starwars and you are just doing the same stuff over and over again. You have to bee a fan of lego games to love this game otherwise you will just find it okay. Game is so frusrating and hard for no reason with random stuff droping from sky.

I did not have any actuall fun playing it or see any reply value so I can't give it a thumbs up.

Good thing is you can kill Hitler.

-Difficult because the background is eye straining

-Weird bosses who sometimes you kill in an instant, sometimes takes like 5 minutes

?Fun for some 10-20minutes

+Trolling (closing game in middle of stage). Who doesn't want to control the future with your mind?
